LETTER OF RECOMMENDATION

It is with great pleasure that I recommend Muniswamy Palla for the Master's degree program at your esteemed University. I have shared a very fruitful association with him for three years as professor. During this period, I taught him the courses of C, C++ and JAVA. During my lectures, I observed his clarity with fundamentals and the ease with which he was able to grasp technical concepts and procedures. He would ask probing questions and frequently come up with alternative solutions during the classroom brainstorming sessions.

Muniswamy is pragmatic, accurate in his work and meticulous with his presentations and technical skills. These qualities are well exhibited through his major project titled, "Multiparty Authentication System". His good programming skills helped him ace in project work. He programmed to enable the protection of shared data associated with multiple users in Social networks. He had developed frontend-using JSP and backend developed using Java. Besides the course work, he participated in all the seminars organized by our university-related to computer science and he also participated in IBM the Great Mind Challenge (TGMC) 2011.

His sound academic background, ability to think independently and his practicality in tackling innovative problems make him an ideal candidate for graduate studies. I find Muniswamy to be a dedicated student and am confident that he will excel in his higher studies. He is interested in strengthening his academic proficiency by pursuing his masters. I strongly recommend him for the graduate program at your University.

Sincerely,

Subramaneswararao
